EDUCATION

Birla Institute of Technology and Science, Pilani
B.E. Computer Science & MSc Economics - CGPA: 8.12

August 2019 – July 2024
Pilani, Rajasthan

Delhi Public School Indirapuram
Central Board of Secondary Education (Class XII) - Percentage: 97.40%

April 2018 – May 2019
Ghaziabad, Uttar Pradesh

WORK EXPERIENCE

Software Engineer: OfBusiness (OFB Tech Pvt Ltd)
Order Admin System:

July 2024 – Present
Gurugram, Haryana

- Led adoption of **AI-agentic development** across the team using **Claude Code** and **Antigravity**; built supporting infrastructure and trained engineers on best practices, improving delivery efficiency by **40%**
- Built **Ved AI 2.0**, an AI-powered customer support assistant; implemented intent detection to retrieve internal service data and automate **Zoho** ticket creation, increasing customer inquiries by **120%**
- Launched a **Fraud and Risk Detection Service** that monitors client transactions in real time and triggers system alerts, detecting **over 2000 potential risk and fraud cases monthly** across procurement and credit systems
- Collaborated with cross-functional teams to design a **Stock Transfer and Invoicing System**, with real-time status tracking, and invoice generation, handling **Rs 50 Cr+ worth of monthly stock movement**
- Spearheaded the architecture and implementation of a **Supplier Portal microservice** enabling self-onboarding, verification, and dashboard tracking, with microservice integrations used by over **10,000 suppliers**

Software Developer Intern: OfBusiness (OFB Tech Pvt Ltd)
Buyer App and Website:

January 2024 – June 2024
Gurugram, Haryana

- Scaled and maintained backend features for **ofbusiness.com** and the **OFB App**, enhancing functionality and performance for a platform serving **500K+ customers** and more than **10K active monthly users**
- Boosted **search success rate by 108%** and **click-through rate by 30%** by refining website search with auto-complete, product keyword mapping, and fuzzy matching
- Improved homepage performance by **55%** by optimizing **API response time** and **Java memory utilization**

Research Intern: Indian Institute of Science
Scheduling for Latency-Sensitive Workload for Sustainable Computing:

August 2023 – December 2023
Bengaluru, Karnataka

- Collaborated with **IBM Research** and the **Centre for Networked Intelligence Lab** to build a **power-saving scheduler model using heterogeneous cores** on an **Intel Core i9 13900K processor**
- Achieved an **80% reduction** in energy-delay product compared to **Linux governors**, demonstrating high efficiency gains, and delivering presentations and visual outputs to highlight key insights

Software Development Intern: Societe Generale Global Solutions
NITRO Project, CLI Tribe:

June 2023 – July 2023
Chennai, Tamil Nadu

- Improved **API and code quality** by resolving **25+ critical issues** in **SonarQube** for the **Invoice API**
- Generated **automated tests** for Invoice API using **JUnit framework** and migrated module from Angular v13 to v15

PUBLICATIONS

- Enhancing security through continuous biometric authentication using wearable sensors:**
Elsevier: Internet of Things, December 2024
- Energy-minimizing workload splitting and frequency selection for guaranteed performance over heterogeneous cores:** ACM International Conference on Future and Sustainable Energy Systems, June 2024

PROJECTS

Continuous Authentication via PPG Sensors

August 2022 – July 2023

- Devised a **Continuous Authentication** model using **PPG data** from **wearable biosensors** worn by 15 volunteers
- Developed an **LSTM ANN** model to learn characteristics of individuals and attained **82% accuracy** for 0.75 confidence

Query System for High-Speed IP Flow Analysis

January 2023 – May 2023

- Engineered a 3-tier framework for query processing on **high-speed network flow storage systems** for CAIR Lab
- Accelerated query performance by **5%** by utilizing **nProbe** to export network flows and analyzing on **Clickhouse**

SKILLS

Programming Languages: Java, C, C++, Python

Database Management: SQL, Redis, MongoDB, Elasticsearch

Backend & Frameworks: Spring Boot, Hibernate, REST APIs, Microservices, System Design, Agile

Tools & Platforms: Claude Code, Antigravity, AI Agentic Workflows, AI Automation, Git, Postman, Linux
